

The image shows a web application interface for 'RAG Lab', described as a 'Project workbench'. At the top left is a yellow square logo with the letters 'RL' in black. To its right, the text 'RAG Lab' is in bold, and 'Project workbench' is in a smaller font. Below this header is a dark grey rounded rectangle containing the text 'Current project' in a small font, followed by 'RAG challenge' in bold, and 'commerce' in a small font. The main area of the interface is dark grey and contains several sections, each with a bold header in all caps: 'PROJECT', 'PIPELINE', 'EVALUATION', and 'ADMIN'. Under the 'PROJECT' section are the links 'Projects' and 'Data'. Under the 'PIPELINE' section are 'Preparation' and 'Chunking'. Under the 'EVALUATION' section is 'Saved Experiments'. Under the 'ADMIN' section is 'Settings'. The 'Chunking' link is highlighted with a light grey background. The overall design is clean and modern, using a dark color palette with yellow accents.

PROJECT	STATUS	DOMAIN
RAG challenge	active	commerce

RETRIEVAL

Retrieval & Reranking

Materialize normalized chunks, embed them with a registered model, and create a Qdrant index cache.

Remote Voyage AI reranker for higher-quality reranking of retrieved candidates. Sends the query and candidate chunk text to Voyage.

Rerank current candidates

Run retrieval first, then rerank the current candidate cache.
